SEE ORDER: WR 92-02, DATED MARCH 19, 1992

P16478

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

**ORDER AUTHORIZING ISSUANCE OF A
TEMPORARY URGENCY CHANGE
FOR
CALIFORNIA DEPARTMENT OF WATER RESOURCES'
APPLICATIONS 5630, 14443, 14445A AND 17512**

1. On July 31, 1998, the California Department of Water Resources (DWR) filed a petition requesting a Temporary Urgency Change to add Tracy Golf and Country Club (Club) as an authorized place of use. The Club has an 18-hole course that requires irrigation of approximately 100 acres of turf. Due to the urgent nature of DWR's request and in accordance with Water Code section 1435 et seq, the State Water Resources Control Board (SWRCB) is required to issue as soon as practicable a notice of the change order.
2. DWR requested the right to divert up to 4.0 acre-feet per day of water during the period from August 1, 1998 through January 15 1999, not to exceed 660 acre-feet. DWR proposes to divert or redivert water at Harvey O. Banks Pumping Plant for Club delivery at milepost 22.16 of the California Aqueduct at a maximum diversion rate of 2 cubic feet per second. The water will be delivered to the Club located within section 35, Township 3 South, Range 5 East, Mount Diablo Base & Meridian in San Joaquin County.
3. Because of the circumstances, this Temporary Urgency Change is being issued in advance of the public notice, in accordance with section 1438 of the Water Code.
4. In accordance with Water Code Section 1437, available records, files, and decisions which relate to the availability of water from the source at the point of diversion or redirection which serves the proposed place of use temporary urgency change, and any associated water rights of downstream users were reviewed.
5. In accordance with Water Code Section 1437, the Department of Fish and Game (DFG) was consulted with regard to the effects of the proposed project on fish, wildlife, and other instream beneficial uses.
6. Prior to issuance of a Temporary Urgency Change pursuant to Chapter 6.6 of the Water Code, the SWRCB is required to make the following findings:
 - The permittee has an urgent need to make the proposed change;
 - The proposed change may be made without injury to any lawful user of water;
 - The proposed change may be made without unreasonable effect upon fish, wildlife, or other instream beneficial uses; and,
 - The proposed change is in the public interest.

The following provides discussion and findings for each of these requirements:

Urgent need of Permittee to make the proposed change

Approval of DWR's petition will allow the State Water Project to deliver an interim emergency water supply to the Club. A well installed in 1993 was the Club's primary water source. Due to a July 6, 1998 earthquake

near Livermore, the well no longer supplies the Club with an adequate water supply. The Club has a 7-day supply of water stored in course ponds combined with pumping from a secondary well. The secondary well, constructed in 1955, is partially collapsed and provides poor quality water due to salts in the aquifer being pumped. The Club is presently rationing its irrigation to tees and greens with minimal irrigation of the fairways. Without approval of the Temporary Urgency Change the Club will lose all 18 fairways due to lack of adequate water. The total amount of water delivered to the Club will depend on actual demand and the amount of time to develop another permanent source.

In consideration of the above circumstances, the SWRCB finds that there is an urgent need to temporarily add the Club to DWR's authorized place of use.

Effect of the Diversions on Other Lawful Users of Water

No diversion is authorized that would adversely affect the operation of the Central Valley Project or State Water Project under permits and licenses for the Projects in effect on the date of this Order. An adverse effect shall be deemed to result from Permittee's diversion at any time the U.S. Bureau of Reclamation and the Department of Water Resources have declared the Delta to be in balanced water conditions under the Coordinated Operation Agreement or at any other time that such diversion would directly or indirectly require the central Valley Project or the State Water Project to release water from storage or to reduce their diversion or redirection of water from the Delta to provide or assure flow in the Delta required to meet any applicable provision of state or federal law. Hydrology projections anticipate that the Delta will remain out of balance throughout 1998. Thus excess water will be available for appropriation pursuant to this Order.

Accordingly, the SWRCB finds that water may be diverted and used without effect upon other lawful users of water.

Effects of the Proposed Diversions on Fish, Wildlife, and Other Instream Uses

On August 4, 1998, the SWRCB staff contacted DFG staff to discuss the proposed project and what, if any, effects it may have on fish, wildlife, and to other instream uses. The DFG staff stated that they had been contacted by DWR, were aware of the proposed project, and concluded that DFG had no direct concerns.

Accordingly, the SWRCB finds that water may be diverted and used without unreasonable effect upon fish, wildlife or other instream beneficial uses.

Public Interest

The SWRCB is charged with the responsibility to see that waters of the State of California are used as reasonably and beneficially as possible. The SWRCB has reviewed the information submitted by DWR and found that the temporary urgency change is a reasonable and beneficial use of water.

Therefore, the SWRCB finds that DWR's diversion under the Temporary Urgency Change is in the public interest and in accordance with the constitutional policy that the water resources of the State be put to beneficial use to the fullest extent of which they are capable.

7. Approval of the proposed action requires compliance with the California Environmental Quality Act (CEQA). The State Water Resources Control Board has considered the information provided by DWR and has prepared a Notice of Exemption. Based on review of the information provided by DWR the SWRCB finds that with the required terms and conditions the project authorized by the Temporary Urgency Change will not have a significant effect on the environment.

Based on the information currently available to the SWRCB, all the provisions of section 1435 are satisfied, and a SWRCB member under SWRCB Resolution No. 97-006 Paragraph 1.3 may authorize issuance of this Temporary Urgency Change.

NOW, THEREFORE, IT IS ORDERED THAT:

A Temporary Urgency Change shall be issued subject to California Water Code, Division 2, Chapter 6.6, Section 1435 et seq., subject to the following terms and conditions:

The place of use for water is the Tracy Golf and Country Club located within section 35, Township 3 South, Range 5 East, Mount Diablo Base & Meridian in San Joaquin County. The water shall be used for irrigation of approximately 100 acres of turf associated with the golf course.

The water delivered to this place of use shall be limited to the quantity that can be beneficially used and shall not exceed 4.0 acre-feet per day (at a maximum rate of 2 cubic feet per second) by direct diversion or redirection from August 5, 1998 through January 15, 1999. The total quantity of water to be delivered to this place of use shall not exceed 660 acre-feet of water.

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this Temporary Urgency Change including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with the law and in the interest of the public welfare to protect public trust uses and to prevent waste and unreasonable use or method of use, or unreasonable method of diversion of said water.

The SWRCB reserves jurisdiction to supervise the diversion and use of water under this Temporary Urgency Change, and to coordinate or modify terms and conditions, for the protection of vested rights, fish wildlife, instream beneficial uses and the public interest, as future conditions may warrant.

This Temporary Urgency Change shall not result in creation of a vested right, even of a temporary nature, but shall be subject at all times to modification or revocation at the discretion of the SWRCB.

4. Condition 10 of the permit be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

Memorandum

Date : August 26, 1987

Ray Walsh, Chief

State Water Resources Control Board

From : Department of Water Resources

Subject : Additional Point of Diversion, North Bay Aqueduct

This is to advise the State Water Resources Control Board that from time to time the State Water Project may provide project water to its North Bay Aqueduct (NBA) water contractors at the City of Vallejo Point of Diversion (POD) on Cache Slough. This notice is as required under Condition 13 of our Water Right Permits 16478 (A 5630) and 16479 (A 14443) - see Memo "Permit 16473 (Application 5630)... et al", Meral to Campos, dated December 12, 1979.

We may supply quantities up to 31.52 cubic feet per second to the Cache Slough diversion for brief periods in the event of a total outage of Barker Slough Pumping Plant. The Cache Slough diversion of the City of Vallejo is located south twenty-four degrees, fifty-seven minutes, thirty-five seconds east (S24°57'35"E) one thousand two hundred-thirteen and sixty-eight hundredths (1213.68) feet from NW corner of Section 10, T5N, R2E, MDB&M, being within NW 1/4 of NW 1/4 of said Section 10 - as shown on maps on file with the Board for the City's License 7848 (A12286).

Project water which is supplied through the Cache Slough diversion will be identified and the quantities reported separately in the Annual Reports on Water Rights submitted to the State Water Resources Control Board.

The City of Vallejo presently diverts up to 31.52 cubic feet per second at their Cache Slough pumps. Therefore, there would appear to be no significant adverse environmental impacts should the need arise to supply the same quantity of project water at that diversion after the City of Vallejo has added our Lindsey Slough POD to their license and is normally receiving their licensed supply through the NBA (also see Final Environmental Statement/Environmental Impact Report for the North Bay Aqueduct dated May 1982).

Permit 15481 (Application
14445A)

Your memorandum of October 25, 1979, to Wayne MacRostie, Chief of our Central District, requests the Department of Water Resources to file a petition to include the City of Vallejo's diversion works on Cache Slough as a point of redirection under Permit 15469 in view of the July 18, 1979, agreement between Solano County Flood Control and Water Conservation District and the City of Vallejo.

Condition 13 of water right Permits 15463, 15469 and 15481 provides as follows:

"No direct diversion, diversion of storage, or redirection of stored water from the Feather River or the Sacramento-San Joaquin Delta for beneficial use under this permit other than from the points of diversion or redirection named in this permit shall be made until a description of the location of each point of diversion and statement of the quantity of water to be diverted is filed with the State Water Resources Control Board."

We understand that this condition was purposely included in the three permits in order to preclude the need to file a petition and obtain a formal Order from the Board each time a new diversion or redirection point becomes necessary under the water supply contracts for State water. Accordingly, we assume that no petition is necessary.

The Department is currently negotiating with Solano a contract amendment that would provide for delivery of water to Solano for Vallejo. When that agreement is complete, we will notify you and provide you with the information required under Condition 13.

Comment re: letter of 12/12/79 to Campos:

While the letter is correct, the place of use under Permit 16481 (Application 14445A) does not include the North Bay area.

Therefore, when the Board is formally notified as mentioned in the last paragraph of the letter we should not include Permit 16481.

AND OF STATE BOARD RESOLUTION 73-16

Order: WR 75-7

ORDER ALLOWING TEMPORARY SUSPENSION OF BLIND POINT
CONDITION IN WATER RIGHT PERMITS NOS. 16477-16483
AND TEMPORARY MODIFICATION OF WATER QUALITY OBJECTIVE
A-2, STATE BOARD RESOLUTION 73-16

BY THE BOARD:

1. The Department of Water Resources and the Department of Fish and Game have requested the State Water Resources Control Board to temporarily (a) suspend condition 15 of Decision 1275, as amended by Decision 1291, which is incorporated in the above-numbered permits issued to the Department of Water Resources and (b) modify objective A-2 of Resolution 73-16 (Water Quality Control Plan Supplementing State Water Quality Control Policy for Sacramento-San Joaquin Delta), respectively.

2. Notice of tentative staff recommendation in regard to the requests has been circulated to interested parties.

3. The State Water Resources Control Board has reviewed the information pertinent to the requests submitted by the Department of Water Resources and the Department of Fish and Game.

4. The purpose of these requests is to conduct tests as part of a cooperative study to evaluate factors controlling the survival of young striped bass.

NOW, THEREFORE, the State Water Resources Control Board finds that temporary suspension of condition 15 and temporary modification of Water Quality Objective A-2 in State Board Resolution 73-16 for the year 1975 is in the public interest in that the information to be acquired and analyzed by the Department of Fish and Game may contribute to a fuller understanding of the Bay-Delta Ecosystem;

NOW THEREFORE, IT IS ORDERED that:

1. Condition 15 is suspended for the year 1975.

Permits 16478, 16479, 16481, and 16482

**ORDER APPROVING CHANGE IN THE PLACE OF USE
AND AMENDING THE PERMIT**

WHEREAS:

1. Permits 16478, 16479, 16481, and 16482 were issued to the California Department of Water Resources on September 26, 1972, pursuant to Applications 5630, 14443, 14445A, and 17512.
2. A petition to add 466 acres to the place of use for the State Water Project was filed with the State Water Resources Control Board (SWRCB) on February 11, 2000. (The additional area is located within the Western Hills Water District in Stanislaus County.)
3. The SWRCB has determined that good cause for such change has been shown.
4. Public notice of the change was issued on February 18, 2000, and one protest was received from the California Regional Water Quality Control Board, Central Valley Region.
5. Protest issues have been resolved, resulting in conditions to be added to Permits 16478, 16479, 16481, and 16482.
6. The SWRCB has determined that the petition for change in place of use does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water. In addition, the SWRCB has determined that the change will not conflict with the general or coordinated plan or with water quality objectives established pursuant to law.

NOW, THEREFORE IT IS ORDERED THAT:

1. The place of use for Permits 16478, 16479, 16481, and 16482 is expanded to include a net of 466 acres within the Phase 1 boundary, approximately 2,300 acres, as shown on a map on file with the State Water Resources Control Board. The additional acreage is located within Western Hills Water District and known as the Diablo Grande Project.
2. The Permittee shall ensure that Western Hills Water District requires Diablo Grande Limited Partnership (Diablo Grande) and its successors or assignees, to implement and comply with the following measures concerning erosion and sediment control and prevention:
 - a. Diablo Grande shall prepare and submit to the Central Valley Regional Water Quality Control Board (Regional Board) a written report explaining (a) the nature and location of the erosion control measures that have been implemented by Diablo Grande in November 1999-March 2000 along Diablo Grande Parkway (aka Oak Flat Road) (work performed under WDID No. 5B50S303265), and (b) the plan to place gravel on the shoulder of the sloped and curved portions of the road, including a map or drawing showing the locations of the road shoulders to be graveled. The report shall be submitted by April 30, 2000. The rock gravel shall be placed by June 30, 2000.
 - b. Diablo Grande shall compile and submit to the Regional Board copies of the documents that have been submitted to the U. S. Army Corps of Engineers concerning wetlands delineation and identification, wetlands avoidance, wetlands impacts mitigation plan and related maps for the entire phase 1 (approximately 2,300 acres) Diablo Grande development project.
 - c. For construction work on the Diablo Grande project (phase 1, approximately 2,300 acres), conducted after the date of this order, Diablo Grande shall prepare and submit to the Regional Board a site-specific erosion and sediment control and prevention plan for each construction project (i.e., cut-across road, hotel/conference center, winery, housing development, water and wastewater treatment plants). Each plan shall include the following elements:
 1. Explanation of site specific erosion control measures and devices to be implemented during construction, including a map or drawing showing the location of such measures and devices.
 2. Timeframe or schedule of implementation.
 3. Inspection and monitoring plan, including the frequency of inspections and means of documenting inspections.
 4. Alternative plan of erosion control measures and devices to be implemented in the event an initial measure or device fails.

5. Accident response plan showing how Diablo Grande will respond to an incident involving unanticipated erosion or other failure of an erosion control device or measure.

Each plan shall be implemented and shall be consistent with applicable storm water pollution prevention plans and general permit requirements for waste discharge requirements. Each plan shall be submitted to the Regional Board prior to the commencement of construction of the particular construction project.
